DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-26 are rejected under 35 U.S.C. 102(e) as being anticipated by Stern-Berkowitz et al (Stern-Berkowitz), US 2004/0192326.

Regarding claims 1-26, Stern-Berkowitz discloses an efficient method of monitoring neighboring cells in a communication system, comprising the steps of: monitoring at least one neighboring cell among a plurality of cells for a load condition on the at least one neighboring cell; monitoring the at least one neighboring cell for a service capability; and discontinuing the monitoring of the at least one neighboring cell if a desired service capability fails to match the service capability of the at least one neighboring cell or if the load condition fails to meet a predetermined load condition (pages 2- 3 [0025-0037] and pages 6-7 [0074-0089]).

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
